

# Dr. Buzby's ENCORE MOBILITY™

Encore Mobility contains bioactive New Zealand Deer Velvet with Green Lipped Mussel in a tasty chewable tablet, the perfect joint supplement for your dog to improve joint mobility, boost stamina and vitality.

Did you know that osteoarthritis affects 4 in 5 of all dogs??

Osteoarthritis or degenerative joint disease is caused by the deterioration of the cartilage in the joints and inflammation in the surrounding tissues. This makes movement painful. Daily feeding of Encore Mobility can help to stimulate the repair of joint cartilage with healthy doses of glucosamine and chondroitin.

*Jasper, 9 year old, Labradoodle has hip osteoarthritis causing stiffness and limping.*

*'I have not seen any limping; he seems happier at home and on his walks- people keep saying how much younger he looks. We notice it at home- he seems to be smiling more for sure'*  
- Malissa, owner

All-natural key ingredients from Bioactive Deer Velvet and Green Lipped Mussel which work synergistically to benefit your dog.
