

Size	Pad Width	Adjusting	Weight*	Gender	
Mini	1.5"	28" - 69"	Under 15 lbs	FEMALE	MALE
Small Male	3.5"	37" - 60"	15 - 45 lbs		
Small Female	4"	37" - 60"	15 - 45 lbs		
Medium (Large Male)	5.5"	38" - 60"	45 - 200 lbs		
Large Female	7.5"	38" - 60"	55 - 200 lbs		
Tall Male (For Lean Dogs)	5"	26" - 37"	70 - 200 lbs		
Tall Female (For Lean Dogs)	7.5"	26" - 37"	70 - 200 lbs		

*Size should be determined by Pad Width and Adjusting Measurements, not the weight of your dog

How to Measure

Support Pad Width

Measure from the front of the hind legs (in front of the penis for male dogs) towards your dog's chest to determine the support pad width. For dogs with barrel chests (i.e. Boxers, Pit Bulls), measure just the belly area to the base of the rib cage.

Downsizing is common for these dogs.

Adjusting Dimensions

Measure starting where the handle of the GingerLead will rest in your hand (while you are standing upright), continue under your dog's belly, up the other side, then back to your hand completing the loop. If it measures 37" or less, the Tall size should be considered.

Still not sure? ...try the towel test

Female Dogs

Fold a bath towel to 7.5 inches wide to simulate a large, female GingerLead, then sling it under her belly. If that's too big, then re-fold the towel to 4 inches wide to simulate a small, female GingerLead. If she is in between sizes, re-fold the towel to 5.5 inches to simulate a large, male GingerLead. If the small is too big for her, try our Mini GingerLead.

Male Dogs

Fold a bath towel to 5.5 inches wide to simulate a large, male GingerLead, then sling it under your dog's belly in front of his penis. If that's too big, then re-fold the towel to 3.5 inches wide to simulate a small, male GingerLead. If that's too big for him, try our Mini GingerLead. Male Dachshunds typically use the Mini GingerLead with the sling behind their penis.

Check with your veterinarian if you have any questions about whether a GingerLead will fit your dog's needs given their specific medical condition(s)
